

How to install and register Repute 2.5 (from the web)

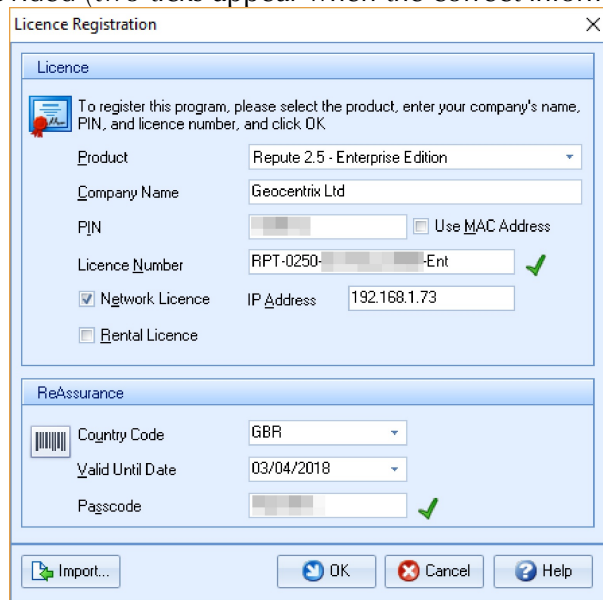

1. Download and run the latest Repute 2.5 Setup program, found here:

www.geocentrix.co.uk/repute/update

2. When you first run Repute, it will display the message:

3. Click **Yes** to proceed to Licence Registration.
4. If you have been sent a licence (.LIC) file by Geocentrix, click on the **Import...** button and navigate to the location where you saved that file. Select the file and click **Open**. Your licence will be displayed in the Licence Registration box.
5. If, instead, you have your licence details in text format, enter those details exactly as provided (two ticks appear when the correct information is entered).

6. *If you have a purple licence key (dongle), you have purchased a standalone licence for Repute. Attach this key to your computer.*
7. *If you have a red licence key, you have purchased a network licence. Attach this key to your server. Then tick the **Network Licence** box and – in the box that appears – enter the **IP Address** of the server (e.g. 192.168.1.65).*
8. Check the details given in the Licence Registration box (both the Licence Number and Passcode should be ticked) and click **OK** to save your licence.
9. The program's title bar should now read "Repute 2.5 xxx Edition – logged in" (where xxx is Standard, Professional, or Enterprise).
10. You can now use Repute! For further help, please contact Technical Support at:
