How to install Repute 1.5

1. Place the Geocentrix Software CD in your CD-ROM drive. The Browser (right) should automatically appear (if not, run **SETUP.EXE** from the CD's root folder).

2. Click on the text **"Click here to install Repute 1.5"** or the arrow 🔌 to run the Repute installation program.

3. When asked "Do you want to run or save this file?" click **Run**. If a security warning appears, click **Run**.

4. When the welcome screen appears, click **Next**.

5. Read and accept the License Agreement and click **Next**.

6. Review the release notes and click **Next**.

7. Select which features to install and choose an install path, then click **Next**.

8. When you are ready to update your system, click **Next**. The Repute Setup program will install the necessary files on your system.

9. When setup is complete, click **Finish**. The HASP Device Driver setup program will then start, allowing you to install the drivers necessary for Repute to communicate with its security key. Select a language and click **OK**, then follow the on-screen instructions.

10. When the HASP setup is complete, click **Finish**. If you ticked the **Run Repute** box, Repute will start automatically.

11. To register your copy of Repute, click **Tools > Licence Registration Wizard** from the program's main menu and enter your details <u>exactly</u> as found on the program's packaging. Make sure the supplied security key is attached to your computer and click **OK**. Check the **Messages** tab in the **Results** window for confirmation that you may run this program using the attached security key.

To learn how to use the program, we suggest you follow Tutorials 1-3 in the program's User Manual (available in Adobe PDF format from **Start > All Programs > Geocentrix > User Manuals > Repute 1.5 User Manual**).
